Street Resurfacing: Forty-three Blocks in Northeast Sedalia

A major street resurfacing project began in northeast Sedalia in late May and is anticipated to be complete by September 1, 2017. The area is bounded on the west by North Veteran's Memorial Drive, on the east by North Depp Avenue, on the south by East Howard Street and on the north by East Tower Street.

Beginning on Tuesday, June 20, 2017, the following North-South running streets will be milled and resurfaced. This work requires closing of the following streets and residents who routinely park along these streets will need to find alternate parking along East and West running roadways for 1-2 days during the initial phase of the project. During the second week of the project, East-West running streets will be milled and resurfaced and residents routinely parking along these streets will need to find alternate parking along North and South running roadways for 1-2 days. Street Department staff is attempting to make contact with all residents and are posting signs regarding the work zones.

North-South Running Streets (beginning June 20, 2017)

- North Hurley Avenue between East Boonville Street and East Saline Street
- North Hill Avenue between East Tower Street and East Boonville Street
- North Randolph Avenue between East Saline Street and East Howard Street
- North New York Avenue between East Howard Street and East Tower Street

East-West Running Streets (anticipated to begin June 27, 2017)

- East Jackson Street between North Engineer Avenue and North Heard Avenue
- East Walnut Street between North Engineer Avenue and North Emmet Avenue

This roadwork does include two phases. During the initial phase, residents will need to find alternate parking until the roadway has been milled and compacted which is anticipated to take 1-2 days. After completion of this initial work, residents can drive and park on the street during an approximately 30 day cure period prior to installation of the final two inch (2”) asphalt cap. When asphaltting of each street is scheduled, residents will be notified through additional Public Service Announcements.

In addition during May and early June, city crews completed asphaltting of five (5) sections of roadway including East Howard Street from North Veteran’s Memorial Drive to North Engineer Avenue, North Veteran’s Memorial Drive from East Howard Street to East Saline Street, North Summit Avenue from East Howard Street to East Saline Street, North New York Avenue from East Harvey Avenue to East Howard Street and East Harvey Street from North New York Avenue to North Emmet Avenue.

We apologize for any inconvenience these road closures may cause as we work to improve this area. Please note that this resurfacing project is weather dependent and may be delayed due to rain.

When: Tues., June 20, 2017 through Friday, September 1, 2017

Where: Area bounded by North Veteran’s Memorial Drive on the west, North Depp Avenue on the east, East Howard Street on the south and East Tower Street on the north.

Why: Street Resurfacing
